Quick Tool Holder

HAND SAFETY TOOL

The Quick Tool Holder enables easy storage of and access to your Hand Safety Tool Company tools including the ShovelIt™, GrabIt™ and HoldIt™.

The Quick Tool Holder gives you easy access to your tools when and where you need them while keeping them stored in a neat and organized fashion.

Hold Up

The positive rubber grip on the quick tool holder securely holds a tool up to ten-pounds.

Switch Way

The holder's versatility enables tools to be stored horizontally or vertically with a simple quick adjustment.

Opposites Attract

The Quick Holder Tool may either be installed permanently to a wall via the pre-drilled holes or repositioned as needed using the tool holder's six heavy-duty magnets to attach and detach from metal surfaces.

Rapid Deployment

While the rubber provides excellent grip to hold the tool, it also provides the flexibility needed to easily remove a tool using only one hand.
